VM5E series

Achieving Incredible Immersion

Seamless Large Screens with Extreme-Narrow Bezel

The borderless design, with its 0.9 mm* even bezel and 1.8 mm* BtB (Bezel to Bezel), verified by Nemko, minimizes bezel interference and delivers immersive and seamless content on assembled video wall screens.

* The 0.9mm even panel bezel and 1.8mm BtB size (borderless type, no metal bezel) have been verified by Nemko, a global institution that tests and certifies electrical equipment.

Image Gap Reduction

The VM5E series includes an image improvement algorithm that can reduce image gaps among tiled displays when playing back videos. Objects located on the bezel boundaries are adjusted for a seamless viewing experience.

^{*} The "Conventional" refers to displays which do not include an image improvement algorithm.

VM5E series

Vivid and Dynamic Picture Quality

Higher Viewing Angle

Large screens are usually positioned higher than human-eye level, making uniform picture quality essential for video walls. The viewing angle of the VM5E series is high enough to display vivid colors throughout the screen with no distortion.

45°* High Viewing Angle

* Results based on in-house testing. Actual test results may differ depending on environment and measuring equipment.

Wider Viewing Angle

It is well known that LG IPS panel technology provides better control of liquid crystals, which in turn allows the screen to be viewed at virtually any angle. Thereby, the VM5E series captivates the attention of more viewers with lifelike colors, regardless of their viewing position.

VM5E series

Powerful Smart Signage Platform

High Performance and Great Scalability

Thanks to its built-in SoC and webOS smart signage platform, the VM5E series can execute several tasks at once while providing smooth content playback without the need for a media player. As webOS supports HTML5 as a web-based platform and offers SDK^(Soft Development Kit), it is even easier for SIs to build and optimize their web apps.

Flexible Content Creation

Four different videos can be played simultaneously via web apps, and various animation effects, such as scaling or rotating, are added to content using CSS^(Cascading Style Sheets) transition effects. Real-time streaming* is also available, providing the flexibility to organize and diversify content free from capacity limits.

^{*} Supported protocols: RTSP, RTP, HLS, UDP Multicast

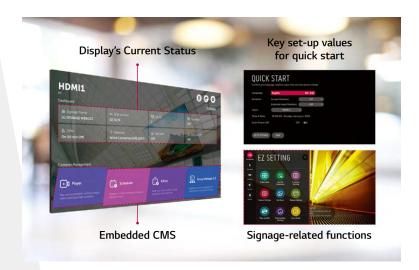

VM5E series

User-Friendly Smart Signage UX

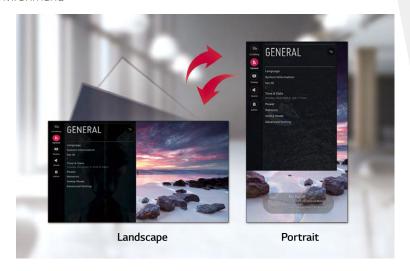

Intuitive Menu Structure

The menu structure has been optimized for commercial use. It simplifies approach flows and groups similar functions together, adopting a more intuitive GUI for ease of use. This way, users can avoid having to do trial-and-error when exploring desired functions and managing displays.

Dedicated GUI for Portrait Orientation

The conventional GUI^(Graphic User Interface) was designed based on landscape-oriented consumer TV usage, so OSD^(On Screen Display) wasn't well-suited for screens in portrait mode. The OSD of the VM5E series, however, consists of a long range menu with bigger font sizes and a 9:16 ratio, creating a comfortable and efficient business environment.

A

Artistic Immersion, Overwhelming Captivation

VM5E series

User Convenience

Easy Color Adjustment

Depending on the content, the color temperature of the display can be easily adjusted in increments of 100K using a remote control.

Simple White Balance Adjustment

In conventional video walls, white balance was adjustable only in "full-white" mode, but the VM5E series allows you to modify each value of grey scale to achieve more detailed and precise white balance adjustment.

VM5E series

User Convenience

LAN Daisy Chain Management

A LAN daisy chain allows you to execute commands to control and monitor video walls and even update their firmwares at once.

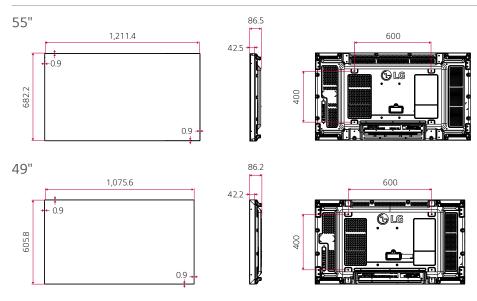

Real-Time Care Service

The maintenance gets easier and faster with an optional service Signage365Care*, a cloud service solution provided by LG service. It remotely manages status of displays in client workplaces for fault diagnosis and remote-control services, ensuring the stable operation of a client's business.

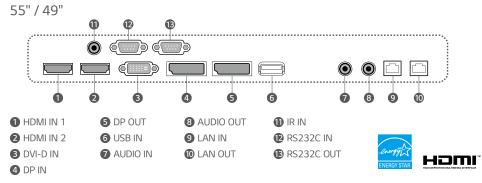

* The availability of Signage365Care service can differ by region, so please contact the LG sales representative in your region for further details.

Dimension (Unit: mm)

Connectivity

^{*} Dimensions & Jack Panels (Read/Side) may differ from the above image, so please contact LG sales team to verify before ordering.
